Mandurah Flyscreens & Security Doors & The Home Hub

We've been around for a long time and it shows!

Mandurah Flyscreens and Security Doors has been providing the highest standards in home security and insect control in the Peel Region since 1971.

That's over 40 years serving the community!

In the early days, door technology was pretty limited only really offering basic flyscreen doors and grille type security doors and were fitted using standards that represented security requirements at the time.

We've certainly done some growing and learning since then to now become the regions largest provider of security products and now offer Australia's most advanced security screens and insect products currently on the market.

With a range that now covers 5 levels of standards and a massive selection of door designs, materials and technologies - we have a door to suit any situation and any home.

To layer upon our top shelf products and services on offer, we have expanded our range to high quality custom patios and insect enclosures, manual and motorised blinds and roller shutters, and to top off our all encompassing security range - CCTV Camera Systems, alarm systems, home & business automation and audio/video systems. WOW! All of that under one roof?

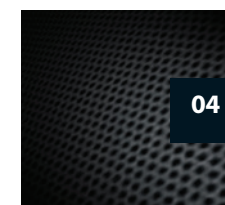

That's why we created "THE HOME HUB" - We needed a one stop shop for all of these amazing products, so why would you go all over town when The Home Hub can take care of you now?

Mandurah Circa 1970's

SecureView
Eclix Stainless Security

5 Star Security Level

Secureview Stainless Steel Security

Built from toughened 316 grade stainless steel mesh, Secureview doors & screens are our toughest and most durable. Meeting the AS2008 certification for impact, cutting and jimmy resistance, you can be assured you have one of the most secure systems on the market.

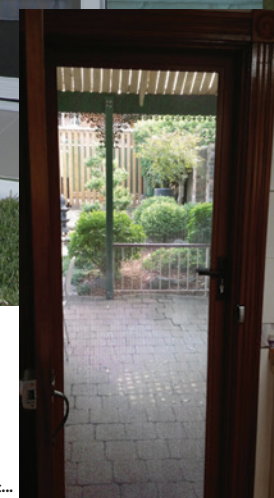

Xceed
Perforated
Screens

4 Star Security Level

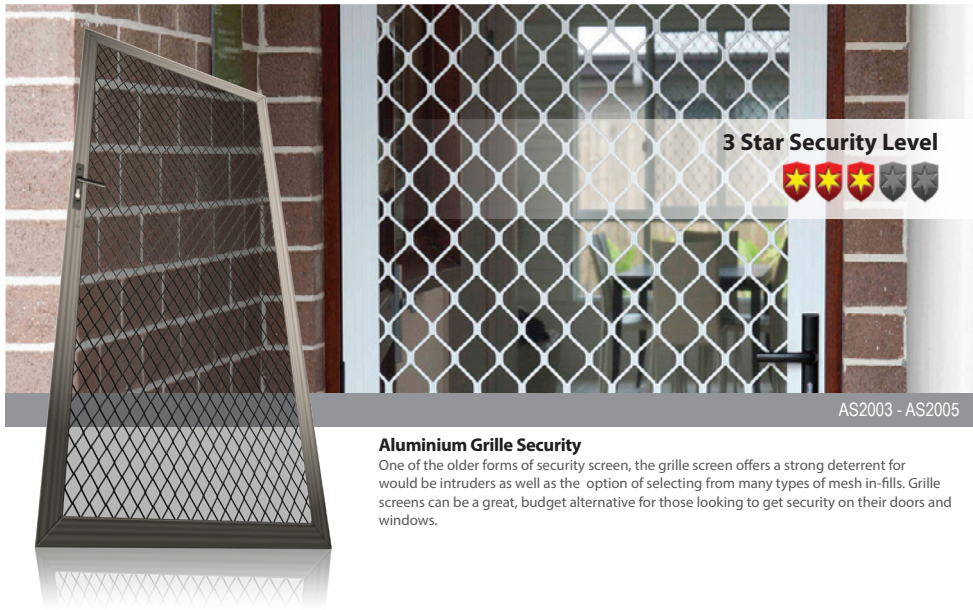

Secureview Xceed Aluminium Perforated Mesh Security

Instead of a woven mesh, perforated mesh is a flat 1.6mm sheet of aluminium which has thousands of holes punched into it for visibility and airflow. The door is lighter but still meets the AS2008 standard for all doors & screens.

Roller Shutters

Residential & Commercial - Manual & Electric

Residential Roller Shutters

Roller Shutters are the perfect way to improve security in your home, lower your heating & cooling bills and shut out the world when you need some added privacy.

✓ We DO...

- Offer the best products & services.
- Give the best pricing, first time.
- Have 43 years servicing the Peel Region.
- Offer the best back-up service & parts.

✗ We DON'T

- Use drawn out, high pressure sales.
- Need to call a "MANAGER" for a better deal.
- Pay any commissions or use after sale contracts.
- Make you wait for after sales service. We're local!

Don't Risk It...

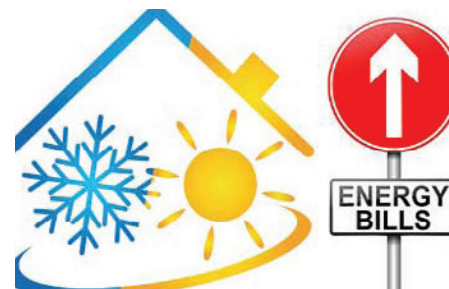

Don't risk buying from out of town suppliers.
Call us today for a free, onsite measure & quote to see the difference.

Commercial Roller Shutters

Protect your investment and livelihood.
With thicker slats and secure locking, commercial shutters are one of the best ways to protect your business from unwanted visitors.

The Benefits of Roller Shutters

Our rollershutters are all measured and fitted to each custom opening. This means you always get a perfect installation with no gaps or odd shapes. All shutters are available in a spring loaded, manual winding mechanism or an electric motorised system to make life easier. Our shutters are also available in a wide range of colours and colour designs and can be fitted to openings as large as 3.2m wide and 2.6m high!

Reduce Your Energy Bill

Keeping your heating and cooling bill in check is hard work. Design limitations in most homes is a major factor in increasing your homes consumption simply because you can't control the Sun. With a Crimshut Rollershutter you can at least control them when you need by opening and closing the shutter depending on the time of year and day. Some users have reported savings of up to 40% by reducing their air-conditioning and heating usage.

Deter Crims

It's in the name! Deter and shut out crims and potential opportunists with the most effective window protection available on the market. Not only are our rollershutters strong, but an auto-locking system will guarantee your windows are safe and secure when at home, or while you're away.

Protect Against The Weather

We live in a sometimes hostile coastal environment but when the weather's good, we want that view! Using rollershutters you can protect your glass and your home from whatever our spectacular storms can throw at you. You'll have added protection against debris, wind and driving rain.

Patios & Enclosures

Custom Patios, Carports & Lean-To's

Drawing from over 40 years in the home improvements and security manufacturing industry, Patios R Us can deliver the ultimate in high quality, affordable custom designs patios and enclosures.

Your patio purchase will be handled personally by our professional team, from the design, measure and quotation stages, all the way through to the manufacturing and assembly stage. We will guarantee your experience is a happy one with smooth, hassle free service so all you need to worry about, is how you'd like to enjoy your new space!

Insect Proof Enclosures

It's not seasonal! Here in Australia's South-West, we suffer from insect attacks all year round. When the weather is still lovely during the moderate months and you just want to sit outside in the fresh air and enjoy the view, you definitely don't want to have to deal with the constant presence of unwanted visitors. Our specialised, custom enclosures are designed to maximise visibility and air-flow and minimise entry for those pesky bugs!

We use only the highest grade materials and fasteners so your screen stays tight, looks great and withstands the elements and disruption for the longest time.

Sealed Enclosures

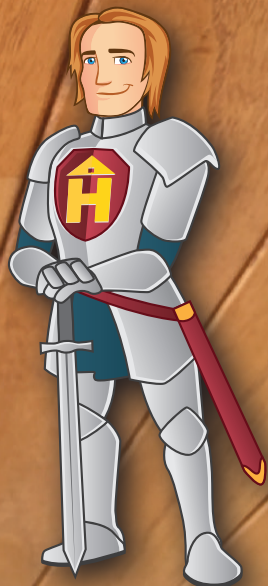

Enjoy your outdoor areas by keeping your view, while keeping out un-wanted guests.

Build An Outdoor Oasis

Outdoor living has never been this good. We can fit to almost any structure. The only limitation, is your imagination.

Alarm & CCTV Systems

Completing The Home Hubs three pronged approach to home & business security is alarms and CCTV. Alarms are your first wall of defence and should act as an early warning system of potential intruders. CCTV is designed for peace of mind and asset recovery. Keep an eye on your home or business without risking your own safety and use footage as evidence to report offences.

Fully Licenced

Mediatek & The Home Hub are fully licenced security providers.

AGENTS LICENCE	41249
CONSULTANTS LICENCE	48041
INSTALLERS LICENCE	52893
ELECTRICAL LICENCE	EC12074

Alarm Systems

Offering a wide range of wired and wireless solutions, Mediatek pride themselves on being at the forefront of technology. Our alarms come with the unique ability to communicate directly with your mobile phone via your home or businesses internet connection.

In fact, our alarms can even take snap shots of your intruder to be used as evidence or safe guard against costly false alarms.

CCTV Systems

CCTV has come a long way even in the last 5 years. While previous systems boasted image resolution barely equivalent to DVD quality, these days we have affordable systems with resolutions up to 4K ultra high definition. With 1080p full high definition being our most popular resolution, you can be assured you'll have the quality you need when the time comes to utilise your recorded footage.

Our CCTV systems are all compatible with smart phone / tablet technology so you won't be without access wherever you go.

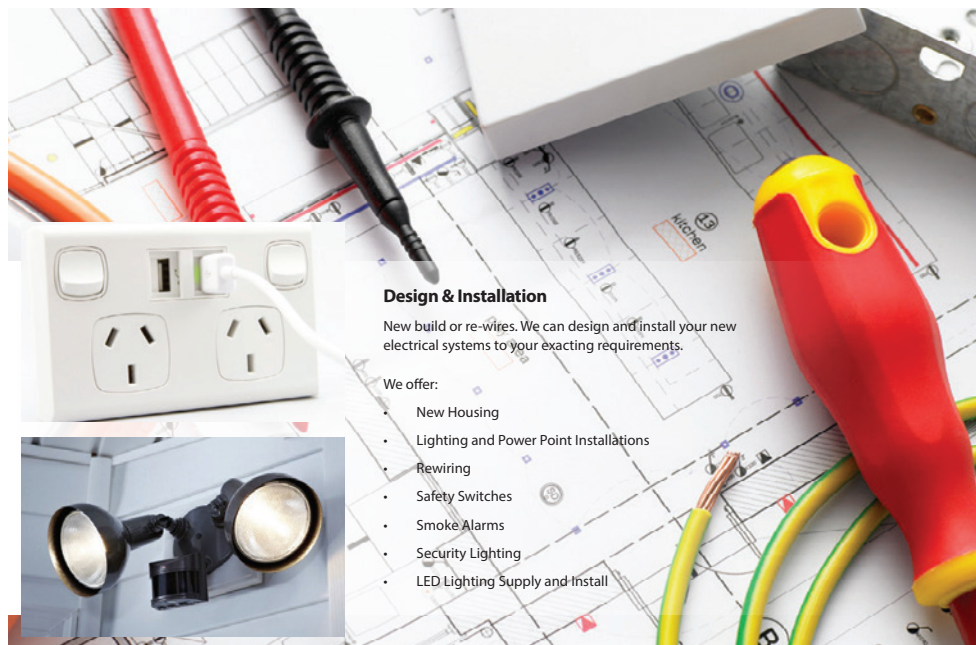

Electrical Services EC12074

All domestic & commercial electrical products and services.

We can help with lighting, power points, re-wires, safety switches, smoke alarms, security and more.

Talk to us about saving money by upgrading to the latest in LED lighting. We can help you to evaluate, design and implement your new economical lighting system.

And if you're struggling to get a grasp of what you need, we can explain and simplify your requirements so you can understand exactly what you're getting out of a new installation.

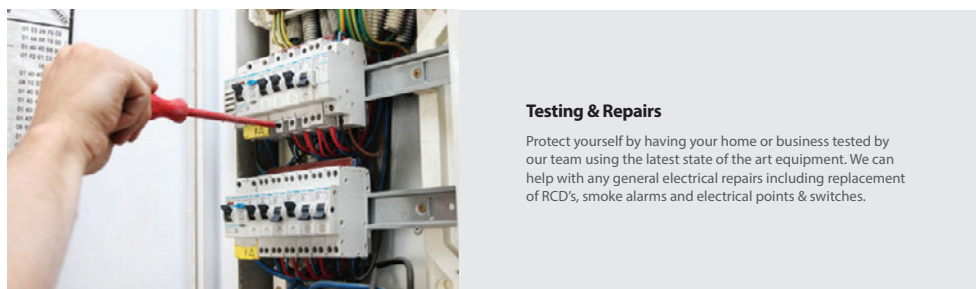

Design & Installation

New build or re-wires. We can design and install your new electrical systems to your exacting requirements.

We offer:

- New Housing
- Lighting and Power Point Installations
- Rewiring
- Safety Switches
- Smoke Alarms
- Security Lighting
- LED Lighting Supply and Install

Testing & Repairs

Protect yourself by having your home or business tested by our team using the latest state of the art equipment. We can help with any general electrical repairs including replacement of RCD's, smoke alarms and electrical points & switches.

Audio, Visual & Communications

Nothing compares to the perfection of custom designed and integrated systems in your home or business. Hard wired and wireless technologies designed to work seamlessly throughout your building. Wifi technology that actually delivers a high speed connection no matter where you are in the home. Audio piped effortlessly to every room in the house if desired and perfect, crisp 4K video delivered to every TV, including the one in your alfresco.

Don't trust your hard earned money to in-experienced box movers. You will be surprised how much more you can get for your money, both in quantity and quality when you have your system designed by one of Mediatek's custom integration specialists.

Home Theatre

Trust the regions premiere custom integrator to design and implement your dream home theatre or media room. We have the experience and knowledge to select the right products for your tastes, needs and budget.

Multi-Room Audio Video

Your home can be divided into individual zones allowing you to control them independent of each other. Or alternatively you can connect zones together to make larger zones with individual controls over each. Source, track, volume etc can all be controlled from one interface and can be combined with other audio video sources to offer the complete whole home AV setup.

Intercoms & Networking

Communications and networking go hand in hand. Mediatek have extensive experience in wireless and cabled communications technology and can get your house connected.

Home & Business Automation

Automation To Make Life Easier & More Efficient

Everything is better when it works together. These days, thanks to Mediatek and Control4, automation systems are accessible to everyone, not just the wealthy. Lighting, Heating, Cooling, Security, Blinds, Audio, Video and much more controlled by one brain that is forever making your life easier and more efficient. Programme lights to turn on automatically when you return home. Set your favourite music to wake you up every morning. Save money by monitoring rooms so when no one is in them, air conditioning and lights turn off or down. The possibilities are endless.

Call Mediatek today to arrange a free demonstration in their state of the art showroom.

Home Automation Starter Systems

From as low as **\$1500** installed.

Control4

Start Small & Grow...

Control4 automation systems aren't just for whole home or business. You can start small, such as just automating your home theatre and then grow the system from there.

Control4 is the king of retro-fit. Using a seamless mix of wired, wireless and multi-voltage components, you can rest assured your home will be compatible with automation.

Lights, AV, Security & More

Everything, working together with complete control at your finger tips.

Be Connected Everywhere

Full support for touch screens, smart phones and tablets. Access your homes automation from anywhere in the world.

Air Conditioning

CCTV & Alarm

Lighting

Wifi & Networking

Locks & Intercom

Audio Visual

Doors & Gates

Reticulation

If you're building or renovating, now is the time to future-proof your home.

Pre-wire & control your whole home and **save money** from as little as \$5000.

INTEGRATED HOME PROCESSOR

No more countless remote controls, apps, networking and security concerns. Connect these facilities to the brain of your home as one unified system.

With Mediatek's Integrated Home Processor, everything in your home has the opportunity to be managed via one smart, powerful & affordable brain. This is not a typical smart wiring package for your new home. Instead it's a central hub for all household facilities to be connected to for ultimate control and security in your home.

Facilities compatible with our processor include: Air Conditioning - CCTV - Alarms - Locks - Gates - Audio Visual - Networking - Lighting & More!

You wouldn't build a home without the right electrical, plumbing & gas, would you? Home integration is no different...

STEP 1

Central Cabinet

We start with a high quality cabinet to neatly contain all of your central wiring, network switches, TV distribution and of course our Home Processor.

STEP 2

Pre-Wire

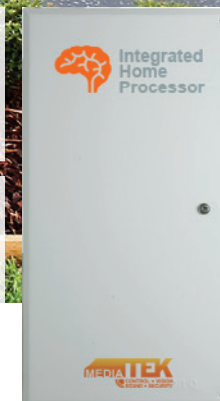

We will then have the right cabling for data, TV and wifi pre-run throughout. Your home will be ready for anything technology can throw at it now, and well into the future.

STEP 3

Integration

We will then work with you to best integrate the products you want installed to your home and give you the control of your home you should always have had.

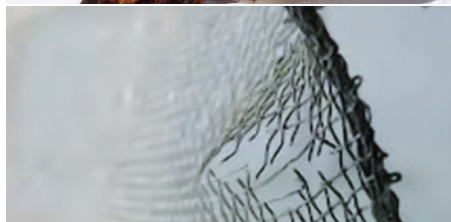

Additional Services

In addition to new products, we also offer a range of services for your existing products.

Glass Door Roller Repairs

If your glass door isn't rolling like it used to, perhaps it's time to have your rollers replaced. We offer a comprehensive onsite replacement service.

Repairs

If you have an existing door or screen that's looking a little worse for wear, we can help. With our skills in building Australia's strongest doors and screens, we can repair older ones to a near new condition if required.

Re-wires & Upgrades

Normally your frames last a long time, but the mesh can take a beating. We can not only replace your existing damaged & un-sightly mesh, but we can upgrade most mesh in-fills to stronger, finer or longer lasting ones.

Spares Service

We are the only doors & screens provider in the region to offer an extensive range of spare replacement parts. Rollers, locks, snibs, latches and more. We even offer parts for glass doors.

Electrical Compliancy Check

Look to The Home Hub to make sure your home or business is up to standard. We can take care of RCD testing, circuit safety evaluations, smoke detector checks, repairs & more.
